Adoption profile link is: _____

Adoption fee is: _____

adoptables feature

health

(i.e.) Describe full health, and vet work, if the animal may need surgery in the future

Paragraph to end full description

“Before you read the below adoption criteria it is extremely important that potential adopters give great thought and communicate in their adoption application as to what their home set up and routine plan is for the first few weeks/months if they are the successful adopter of this very sweet, very sort after animal. They cannot be settled in over just a weekend and then left on a Monday home alone while you return to work, not even just for a few hours... There needs to be a plan outlined so that their foster family can feel assured they are going to be set up for success and not further develop any issues.”

Deal breakers

(i.e.) experience with a certain breed, another dog, adopters home more then not, continued training, indoor most of the time, keep in contact with current foster family etc.

Non deal breakers

(i.e.) extra activities could be suggested like agility, dock diving, join a community club for their particulate breed,

Adoption information

(i.e.) where is the general location of the animal in foster care, is the animal available for interstate adoption and note the successful candidate will need to come to foster care location to complete adoption paperwork and travel home with them. Video footage of their yard & home will also need to be provided along with the agreement to a possible home check by a local rescue volunteer.
